Thank you for the explanation Laurie. I have always reviewed drafts in the field before they are finalized. Currently the START contractor provides an electronic draft for review prior to a final, weather in the field or not.

I have reviewed the current 1900 – 55 and will continue to do so for the Fruitland ER.

Thank you,

Hi Jason,

In response to your questions to Patrick, once we have demobilized from a site we don't run the 1900-55s in draft form for review. If changes need to be made we make a pen/ink change to the 1900-55 and make the actual change on the next 1900-55.

Since we have been handling the Fruitland Magnesium Fire Incident as a sub-task on the ER Umbrella Task Order there will be costs associated with other sub-tasks that are being handled on the TO also. The Dunsmuir cost you are referring to is for the T&D for that site and is a pending item at this point. When those costs are finalized the 1900-55 will be submitted to the appropriate person for approval.

Barbara – since Jason is being dispatched to New Mexico who should we be sending the Fruitland 1900-55s to for review and signature?

Thank you,

Laurie

This task order was done on the CERCLA ER Umbrella. There will be charges for all of the ER's included.

Hi Patrick -

Have a look at the attached markup of the 1900-55. On page 6 there are charges not related to Fruitland (Dunsmuir?). See the note with a ?
